

QUICK FAQ

CURIOUS? START HERE.

Is it invasive?

No. ExoFreeze 2.0 treatments are non-surgical and designed to be comfortable.

Is there downtime?

Most clients return to normal routines after treatment.

What areas can be treated?

Popular areas include: abdomen, waist, thighs, arms, back, jawline, neck, and facial areas.

When do results show?

Some clients notice a refreshed look quickly; body contouring results typically build over a series of treatments.

What should I do after?

Movement and hydration help support lymphatic drainage after your session, which is essential to ensuring your body rids itself of the dead fat cells.
