

What is LumaArc?

LumaArc is a multi-mode LED facial therapy device that uses clinically recognized light wavelengths to support the skin's natural healing and renewal process. Each light mode is designed to target specific skin concerns – from acne and redness to signs of aging and inflammation. With consistent use, LumaArc helps improve overall skin tone, texture, and clarity through a non-invasive, pain-free treatment that fits seamlessly into your daily skincare routine. Designed for all skin types, it delivers professional-level results from the comfort of home.

Target Multiple Skin Concerns

With four specialized light modes, LumaArc addresses a wide range of skincare needs:

- Anti-Aging
- Acne Treatment
- Redness Relief
- Deep Healing
-

Each session takes just 15-20 minutes, making it easy to fit into your daily routine.
